

NEMESIS

NXT

by

Jim Shaf

Build the dream...

...the best way to use 4 tennis balls!

Nemesis NXT is a two place, retractable gear, single engine, kit airplane of all molded carbon fiber construction allowing a very sleek aerodynamic profile.

Powered by a world class **Lycoming T10-540-NXT** engine and a **Hartzell Three Blade Propeller**, NemesisNXT is a high performance, breathtakingly personal transportation and racing airplane available in kit form.

The design of the NXT is a result of extensive wind tunnel testing, thorough computer modeling, coupled with nine years of experience (and success) of

the race plane, Nemesis.

The NXT is a precision handcrafted, high performance kit airplane, built with the highest quality materials.

Each NXT receives meticulous attention in every detail.

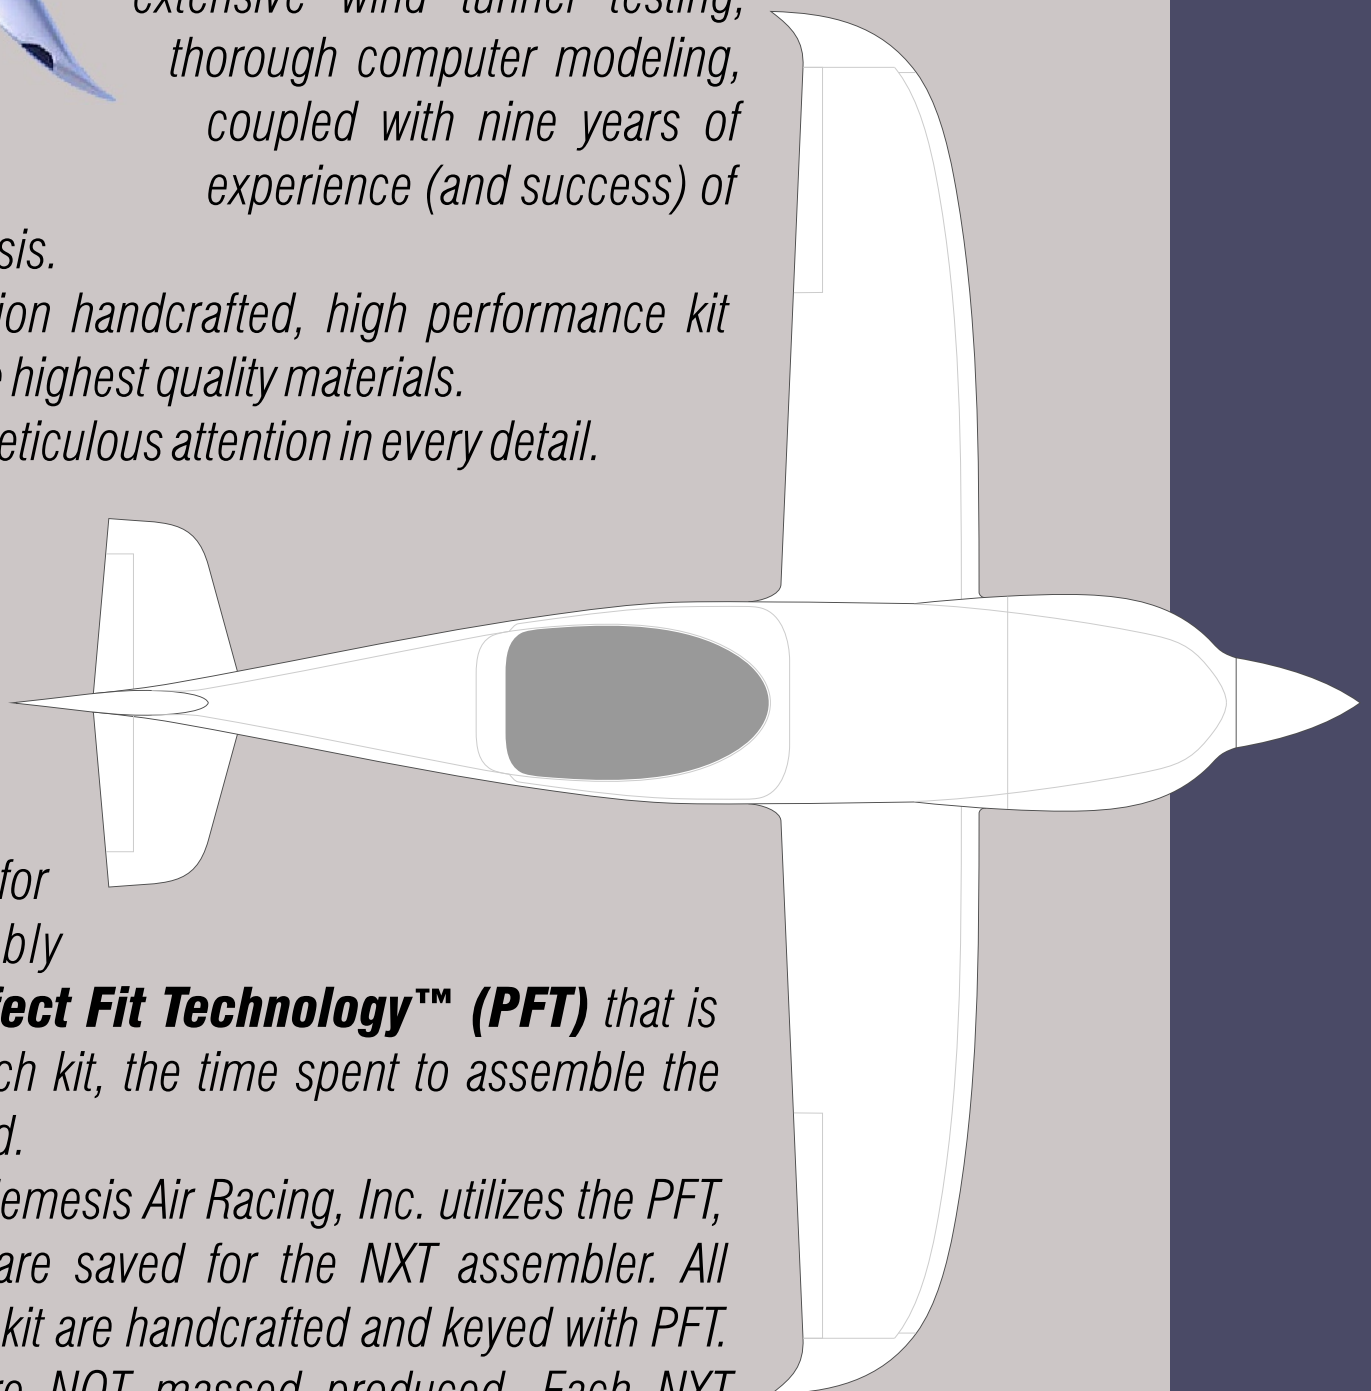

The NXT is designed for fast, easy assembly

Because of the **Perfect Fit Technology™ (PFT)** that is incorporated into each kit, the time spent to assemble the NXT is greatly reduced.

For every hour that Nemesis Air Racing, Inc. utilizes the PFT, hundreds of hours are saved for the NXT assembler. All components of each kit are handcrafted and keyed with PFT. NXT components are NOT massed produced. Each NXT receives PFT ensuring ease of assembly and fast build times.

NEMESIS **NXT**

Not only is the NXT designed for fast assembly but also for very high performance. NXT is not for every pilot. But for every pilot who wants the feel of a fighter and jet-like speed, built with the technology of proven success – NXT is handcrafted for you!

And there is even room for an adventurous friend & an overnight bag!

Nemesis NXT prototype. N333XT Race# 3X. Pilot Jon Sharp.
NEW 2005 in Classic American Racer paint scheme

Specifications:

Wingspan	24 feet
Length	23 feet
Weight	1500lbs. (empty)
Engine	Lycoming T10-540-NXT
Propeller	3 blade Constant Speed
Fuel Quantity	90 gallons (useable)

Configuration:

- ▶ Two Place, Side by Side
- ▶ Tail Dragger
- ▶ Low Wing
- ▶ Main Gear Retract
- ▶ Steerable Tailwheel
- ▶ Side Stick Controls
- ▶ Carbon Fiber Monocoque Const.
- ▶ Permanently Attached Wing
- ▶ Split Flaps

Performance: Breathtakingly Fast!
